

Wells Harbor, Maine

With the use of **New Technology** (Helix Anchors & Global Positioning) Wells Harbor was able to increase the amount of boats moored in their harbor

Boatmoorings.com installed 62 new moorings with a bow & stern layout, to gain Wells the additional space they needed.

The helix anchors were precisely placed with the use of Global Positioning survey equipment. This type of accuracy has revolutionized the ability to optimize your mooring area.

Space = Boats = Revenue

With these two new advances in the anchoring world, taking a fresh look at your aquatic Real-estate makes a lot of sense.

Boatmoorings.com has the knowledge and equipment to assist you in organizing your mooring Field.
